		Core I		
		Structure and Function of Invertebrates		
<b>Course Objectiv</b>	es:			
The main objectiv				
1.	To u	inderstand the concept of classification and	their char	acteristic features of
		r group of invertebrates.		
2.		ealize the range of diversification of invertebra		
3.		nable to find out the ancestors or derivatives o	2	
4.	To k	now the functional morphology of system biol	<u> </u>	
Course I	:	Core I COURSE CODE:	23MZO10	C1
Course title	:	Structure and Function of Invertebrates		
Credits	:	4	Hours:4	
Pre-requisite:				
		taxonomical classification of invertebrate	animals i	n relation to their
functional morph				
<b>Expected Course</b>				
On the successful		of the course, student will be able to:		1
1.		the general concepts and major groups i on, origin, structure, functions and distribution rms.		K1 & K2
2.	Understand of life patte	the evolutionary process. All are linked in a	sequence	K2 & K4
		is for pre-professional work in agricul	ture and	K3 & K5
3.	***	on of life forms.	iure anu	KJ & KJ
4.		hat lies beyond our present knowledge of life	nrocess	K4 & K6
		and to create the perfect phylogenetic relati	<u>^</u>	K4 & K6
5.	classificati		onsnip m	
<b>K1</b> - Ren		· Understand; K3 - Apply; K4 - Analyze; K5 -	- Evaluate;	K6 – Create
Unit I	concept; Ir	and function in invertebrates: Principles of aternational code of zoological nomenclature;		
	trends in ta	xonomy		
Unit II	and Deute	on of coelom: Acoelomates; Pseudocoeloma erostomia; Locomotion: Flagella and cili c movement in Coelenterata, Annelida and Ech	ary move	ment in Protozoa;
Unit III	feeding ir	and Digestion: Patterns of feeding and digest n Polychaeta, Mollusca and Echinoderma : Gills, lungs and trachea; Respiratory pigmen	ata. Respi	ration: Organs of
Unit IV	tubules; M Primitive n	Organs of excretion: coelom, coelomoduc lechanisms of excretion; Excretion and osm ervous system: Coelenterata and Echinoderma Arthropoda (Crustacea and Insecta) and Mollu ution	oregulation ata; Advano	n. Nervous system: ced nervous system:
Unit V	parasites;	e larvae: Larval forms of free living inve Strategies and Evolutionary significance of ad significance; Organization and general char	larval for

				Core	II							
			Comp	arative Anator	ny of Vertebrates							
Course Ob												
The main o												
1.		Exemplifying the vertebrate origin and the intermediary position of Prochordates										
		between invertebrates and vertebrates.										
2.		Acquires the knowledge on evolution and adaptive radiation of Agnatha and Pisces.										
3.		Understanding knowledge about the first terrestrial vertebrates and the adaptive radiation of land animals										
4.	Imp	arting c	onceptual l	knowledge abou	it the animal life in the air and th	eir behaviours.						
5.		Understanding the origin and efficiency of mammals and evolutionary changes that occurred in the life of vertebrates.										
Course I		:	Core II									
Course title		:	Compara	ative Anatomy	of Vertebrates							
Credits		:	4	Hours:4	COURSE CODE: 23MZO1	C2						
Pre-requisi	ite:											
		owledge	and comp	rehension on zo	oology.							
Expected (					<u> </u>							
				course, student	will be able to:							
	Ren	nember	the gene	ral concepts a	and major groups in animal	K1 & K2						
1.	clas	sificatio	n, origin,	structure, funct	ions and distribution of life in							
1.	all i	ts forms	•									
2.		lerstand patterns		ionary process.	All are linked in a sequence of	K2 & K4						
3.		bly this f		fessional work	in agriculture and conservation	K3 & K5						
4.	Ana	lyze wh	at lies bey	ond our present	knowledge of life process.	K4 & K6						
5.	Eva		nd to crea		phylogenetic relationship in	K5 & K6						
<b>K1 -</b> Re				nd; <b>K3 -</b> Apply	; K4 - Analyze; K5 - Evaluate; F	K6 – Create						
Unit I		morpho	ology; Defi		of Protochordata; The nature nd relation to other disciplines; y.							

	the study of verteende morphology.							
Unit II	Origin and classification of vertebrates; Vertebrate integument and its derivatives. Development, general structure and functions of skin and its derivatives; Glands, scales, horns, claws, nails, hoofs, feathers and hairs.							
Unit III	General plan of circulation in various groups; Blood; Evolution of heart; Evolution of aortic arches and portal systems. Respiratory system: Characters of respiratory tissue; Internal and external respiration; Comparative account of respiratory organs							
Unit IV	Skeletal system: Form, function, body size and skeletal elements of the body; Comparative account of jaw suspensorium, Vertebral column; Limbs and girdles; Evolution of Urinogenital system in vertebrate series.							
Unit V	Sense organs: Simple receptors; Organs of Olfaction and taste; Lateral line system; Electroreception. Nervous system: Comparative anatomy of the brain in relation to its functions; Comparative anatomy of spinal cord; Nerves-Cranial, Peripheral and Autonomous nervous systems.

		-	Sericulture					
<b>Course Objectiv</b>	ves:							
The main objec	tives of	this course are	e:					
1.	1. Students should know basic concepts and techniques in Sericulture.							
Course I	se I : Ability Enhancement Compulsory Course Soft Skill - I							
Course title	Course title : Sericulture							
Credits	:	2	Hours:3	COURSE COD	DE 23MZO1A1			
Pre-requisite:								
Students should	d be awa	re of econom	ic and cultural importance	of sericulture.				
<b>Expected Cours</b>	e Outco	me:						
Upon completion	on of this	s course, Stud	ents would have					
I To under	stand the	e various prac	tices in sericulture. To kn	ow the needs	V2 & V2			
for sericu	lture and	the status of	India in global market.		K2 & K3			
II Able to a	pply the	techniques ar	nd practices needed for ser	iculture.	K1, K2 & K3			
III To know	To know the difficulties in sericulture and be able to propose plans							
against it.					K5 & K6			
K1- Rem	ember; l	K2- Understan	nd; K3- Apply; K4-Analyz	ze; <b>K5-</b> Evaluate;	K6- Create			

	Units
Unit I	Introduction to textile fibers; types- natural and synthetic fibers; sources of silk fiber- Tasar, Muga, Anaphe, Gonometa, Fagara, spider and mussel; properties and importance of silk fiber. History, development, status, characteristics and advantages of sericulture in India.
Unit II	Host plants; Moriculture- distribution, morphology, propagation- seedling, cutting, grafting, layering and micro propagation methods, maintenance- irrigation, manuring and pruning, pests and diseases of mulberry.
Unit III	<i>Bombyx mori</i> - morphology, anatomy, life cycle, geographical locations, larval moults, voltinism, indigenous and commercial races. Diapause. Egg-storage and transportation.
Unit IV	<i>Bombyx mori-</i> morphology, anatomy, life cycle, geographical locations, larval moults, voltinism, indigenous and commercial races. Diapause. Egg-storage and transportation. Rearing houses and equipment. Rearing operations- disinfection, brushing, feeding and spacing. Moulting and spinning. Harvest. Rearing methods- chawki, lasso, showa, shelf-rearing, floor-rearing and shoot rearing. Diseases of <i>Bombyx mori-</i> protozoan, bacterial, viral and fungal. Pests of silkworm- Uzi fly, desmestids, mites, ants, nematodes, aves and mammals.
Unit V	Physical and commercial characteristics of cocoons. Cocoon harvesting and marketing. Cocoon sorting, stifling, deflossing, riddling, cooking, brushing, reeling and re-reeling. Weaving. By-products of sericulture industry.

		ganelles.							
2.			lvement of various cellular of	components in acc	omplishing				
	cell div		<u> </u>	1 • 1	1 COOD				
3.			ccessful performance in cell	biology component	nt of CSIR-				
	UGC		the vilture strange and france	iona ofhasia oomu	f				
4.			the ultrastructures and funct l eukaryotic cells, especially						
	· ·	ganelles.	i cukai youc cens, especially	macromorecules,	memoranes				
Course I	:								
Course title	:		r and Molecular Biology						
Credits									
	23MZO2C1								
Pre-requisit	te:	1							
Students sho	ould have kn		of the basic cellular structur	res and their salier	nt functions in				
prokaryotic	· · · ·								
Expected Co									
· ·			students could		Γ				
1.		nd the	general concepts of cell	and molecular	K2				
	biology.	(1 1	· 1 1 ·	1 (* 1					
2.			ic molecular processes in p especially relevance of		K1 & K2				
			influencing functional featu						
3.			rtance of physical and cher						
			el resulting in modulation		K3 & K4				
		cellular responses.							
4.			vledge on the rapid advan	ces in cell and					
			for a better understanding		K5				
			cluding cancer.						
5.		nd the	general concepts of cell	and molecular	K2				
	biology.				114				

K1- Remember; K2- Understand; K3- Apply; K4-Analyze; K5-Evaluate; K6- Create

	Units					
	General features of the cell: Basic structure of prokaryotic and eukaryotic cells					
<b>Unit I</b> - Protoplasm and deutroplasm - cell organelles; cell theory; Diversity of						
	size and shapes.					
	Cellular organization: Membrane structure and functions - Structure of model					
	membrane, lipid bilayer and membrane proteins diffusion, osmosis, ion					
	channels, active transport, ion pumps, mechanism and regulation of					
Unit II	intracellular transport, electrical properties of membranes. Structure and					
	functions of Intracellular organelles: Nucleus, mitochondria, Golgi bodies,					
	lysosomes, endoplasmic reticulum, peroxisomes, plastids, vacuoles and					
	chloroplasts.					
Unit III	Cell division and Cell cycle: Mitosis and meiosis, their regulation, steps in cell					

	cycle and control of cell cycle. Molecular biology of cell: Structure of DNA							
	and RNA; Process of DNA replication, transcription and translation in pro-							
	and eukaryotic cells; Genetic maps.							
Unit IV	Cell communication and cell signaling: Membrane- associated receptors for peptide and steroid hormones - signaling through G-protein coupled receptors, signal transduction pathways. General principles of cell communication: extracellular space and matrix, interaction of cells with other cells and non-cellular structures.							
	Cancer cells: Characteristic features of normal and cancer cells; Carcinogens:							
Unit V	types and cancer induction; Metastasis; Oncogenes and tumor suppressor							
	genes, apoptosis; therapeutic interventions of uncontrolled cell growth.

	Developmental Biology						
Course Obje							
The main obje							
1.				ametogenesis, cleavage and			
				mbryonic membrane and plac	enta in various		
		and hun					
2.		-	· ·	and applications of cryo-pr	reservation of		
	gamete	es and er					
Course I	se I : Core V						
Course title	:	Develo	pmental Biolog	У			
Credits	:	4	Hours:4	COURSE CODE: 23MZ(	D2C2		
Pre-requisite	:						
Students have	fundament	al knowl	edge in developr	nental biology.			
Expected Co	urse Outco	me:					
On the succes	sful comple	tion of t	he course, studer	nt will be able to			
1.	Define the	Define the concepts of embryonic development K1					
2.	Observe va	Observe various stages of cell divisions under microscope K2 & K3					
3.	Understand	Understand the formation of zygote K4					
4.	Differentia	Differentiate the blastula and gastrula stages K4 & K5					
5.	Learn the	Learn the distinguishing features of three different germ layers K4					
	and format	ion of va	arious tissues and	l organs			

K1- Remember; K2- Understand; K3- Apply; K4-Analyze; K5-Evaluate; K6- Create

	Units
Unit I	Pattern of animal development: Chief events in animal development; History of thoughts and conceptual developments. Gametogenesis: Origin of germ cells, permatogenesis - Sperm morphology in relation to the type of fertilization, Oogenesis - Oogenesis in insects and amphibians; Composition and synthesis of yolk in invertebrates (insects and crustaceans) and vertebrates; Genetic control of vitellogenin synthesis in amphibians
Unit II	Fertilization: Sperm aggregation, Sperm activation, Chemotaxis, Sperm maturation and capacitaion in mammals, Acrosome reaction. Sperm – egg interaction. Sperm entry into the egg - Egg activation - Intracellular calcium release - Cortical reaction - Physiological polyspermy - Fusion of male and female pronuclei - Post fertilization metabolic activation - Parthenogenesis
Unit III	Cleavage and gastrulation: Pattern of embryonic cleavage, mechanisms of cleavage, mid blastula transition - Determinate and regulatory embryos, Factors affecting gastrulation, mechanisms and types of gastrulation in respective animal embryos (Sea urchin, <i>Amphioxus</i> , Amphibians, Aves, Mammals); Fate maps - (Amphibian and Chick), Epigenesis and preformation – Formation of primary germ layers
Unit IV	Embryonic Development; Embryonic development of fish and birds, formation of extra embryonic membranes in mammalian – Organogenesis – Development of endodermal, mesodermal and ectodermal derivatives. Embryonic Induction and neurulation; Formation and migration of neural crest cells - types of neural crest cells and their patterning - primary and secondary neurulation. Gene and development; Anterior- posterior axis in determination in drosophila, Maternal effect genes - <i>Bicoid</i> and <i>Nanos</i> proteins; Generation of dorsal - ventral polarity- Genetic control of segmentation – Gap genes; pair

Poultry Farming								
Course Objectives:								
The main objectives of this course are:								
1. Students should know basic concepts in Vermiculture.								
Course I : Skill Enhancement Course [SEC] - I								
Course title : Poultry Farming								
Credits:2Hours:3COURSE CODE:23MZO2S1								
Pre-requisite:								
Students should be aware of economic and cultural importance of Poultry farming.								
Expected Course Outcome:								
Upon completion of this course, Students would have								
I To understand the various practices in Poultry farming. To know								
the needs for Poultry farming and the status of India in global K2 & K3								
market.								
II To be able to apply the techniques and practices needed or K1, K2 & K								
Poultry farming.								
III To know the difficulties in Poultry farming and be able to K5 & K6								
propose plans against it.								

K1- Remember; K2- Understand; K3- Apply; K4-Analyze; K5-Evaluate; K6- Create

	Units
Unit I	General introduction to poultry farming - Definition of Poultry - Past and present scenario of poultry industry in India - Principles of poultry housing - Poultry houses -
Unit I	Systems of poultry farming
Unit II	Management of chicks - growers and layers - Management of Broilers Preparation
	of project report for banking and insurance.
Unit III	Poultry feed management-Principles of feeding, Nutrient requirements for different
	stages of layers and broilers - Feed formulation and Methods of feeding.
Unit IV	Poultry diseases-viral, bacterial, fungal and parasitic (two each); symptoms, control
Unit IV	and management; Vaccination programme.
	Selection, care and handling of hatching eggs - Egg testing. Methods of hatching
Unit V	Brooding and rearing Sexing of chicks Farm and Water Hygiene - Recycling of
	poultry waste.

#### **Reading list**

- 1. Sreenivasaiah., P. V., 2015. Textbook of Poultry Science. 1st Edition. Write & Print Publications, New Delhi 2.
- 2. Jull A. Morley, 2007. Successful Poultry Management. 2nd Edition. Biotech Books, New Delhi"
- 3. Hurd M. Louis, 2003. Modern Poultry Farming. 1st Edition. International Book Distributing Company, Lucknow."
- 4. Life and General Insurance Management"

## **Recommended texts**

honey	v bees an	id bee keep	ing.	-				
II Acqu	ired skil	ls to perfo	orm bee keeping fr	om managing colonies of				
bees	in order	to harvest	honey and other E	Bee related by-products in	K3, K4 & K5			
differ	different setups and as an Entrepreneurial venture.							
III Know	Knowledge on the harvesting, preserving and processing of bee							
produ	products and identification of the appropriate markets to sell the K5 & K6							
produ	produce.							
K1 Domo	mhar K	2 Underst	and K3 Apply: KA	LAnalyze: K5-Evaluate: K6-	Create			

K1- Remember; K2- Understand; K3- Apply; K4-Analyze; K5-Evaluate; K6- Create

	Units
Unit I	Introduction to Apiculture. History, classification, types, life Cycle of different species of Honey Bees and their behavioural patterns. Social organization of bee colony
	Bee-keeping system, tools and equipment's needed for bee keeping. Types of bee
Unit II	hives, structure and functional features. Criteria for site selection for apiculture and
	factors affecting them.
	Identification and characteristics and Preventive measures to be taken against of
Unit III	different bee enemies. Diseases affecting honey bees and their control measures.
	Colony collapse disorder and its management.
Unit IV	Bee products, uses and importance- Honey, Royal jelly, Propolis, Pollen and Bee
Unitiv	venom. Harvesting, Processing, Packaging and Marketing of bee products.
Linit V	Apiculture industry around the world and Role of Central Bee Research & Training
Unit V	institute in India. Apiculture as an Entrepreneurial venture.

## SEMESTER-III

			Core VII						
			Genetics						
<b>Course Obje</b>	ctives:								
The main obj									
1.		Understanding DNA as genetic material, fine structure of DNA & RNA							
			<u> </u>	mical properties of macromo					
2.				s occurs during protein synth					
3.				of chromosome and chromos	somal basis of				
	genetic								
4.			nowledge about micro						
5.	To prov			A technology and its applic	ation.				
Course I	:		re VII						
Course title	:	Ge	netics						
Credits	:	4	Hours:5	COURSE CODE:23MZO3C1					
Pre-requisi	te:								
		cula	r biology and genetics	3					
<b>Expected</b> Co	urse Outco	ne:							
On the succes	ssful comple	tion	of the course, student	will be able to					
1.	Explain the the living s	-	-	ons of genetic material in	K1 & K2				
2.	-	•		ses in protein synthesis	K1 & K2				
3.				ons of chromosomes and	K2 & K4				
	-	the	diseases caused	by the chromosomal					
	abnormalit	ies.		-					
4.	Able to dis	sting	uish lytic and lysoge	nic cycle and explain the	K2 & K5				
	mechanism	s of	genetic recombination	n of the microbes.					
5.				tion of rDNA technology	K2 & K3				
	for the wel	fare	of human being.						

K1- Remember; K2- Understand; K3- Apply; K4-Analyze; K5-Evaluate; K6- Create

	Units
Unit I	Structure, properties and functions of genetic materials: DNA as the genetic Materials - Basic structure of DNA and RNA, alternate and unusual forms of DNA - Physical and Chemical properties of nucleic acid, base properties, denaturation and renaturation, Tm and cot values, hybridization.
Unit II	Genetic code - Methods of deciphering the genetic code and general features of the code word dictionary. Chromosomal genetics: Molecular structure of chromosomes - Variation in chromosome number and structure - Chromosome nomenclature - Chromosomal syndromes.
Unit III	Microbial Genetics: Genetics of Virus - Viral chromosome, Lytic cycle, Lysogenic cycle - Bacterial genetics -Bacterial genome - Gene transfer mechanisms in bacteria and virus - conjugation, transduction and transformation
Unit IV	Recombinant DNA technology: Recombinant DNA technology - Overview - Tools for Recombinant DNA Technology - Vectors - types - Techniques used in recombinant DNA technology - generation of DNA fragments - Restriction endonucleases, DNA modifying enzymes, Ligases
Unit V	Introduction of rDNA into host cell - calcium chloride mediated gene transfer - <i>Agrobacterium</i> mediated DNA transfer, electroporation, microinjection, liposome fusion, particle gun bombardment - Selection and screening of transformed cells - Expression of cloned gene; Application of rDNA

			Evolution					
<b>Course Object</b>	ives:							
The main objec	tives of th	is co	ourse are:					
1.	To critic	cally	analyze the concepts	of evolution in order to				
2.	Underst	Understand the factors responsible for origin and generation of diversity						
			g beings and					
3.	To deve	lop	strategies for sustenand	ce of life on this planet				
4.				of evolution in order to				
Course I	:	Co	ore VIII					
Course title	:	Ev	olution					
Credits	:	4	Hours:5	COURSE CODE:23MZ	O3C2			
Pre-requisite:		1						
Students shall	have bas	sic	knowledge on the d	iversity of animals, biolo	gy including			
morphological,	anatomica	al, p	physiological and emb	ryological features of vario	ous phyla and			
their environme	ent.							
<b>Expected Cour</b>								
On the successf	ùl comple	tion	of the course, student	will be able to				
1.	To under	rstar	nd the concept of e	volution. It provides a	K1 & K3			
	comprehe	nsiv	e account of evidence	es to support concept of				
	evolution and different theories for exploring the mechanism							
	of evolution.							
2.	Study the origin of eukaryotic cells; Evolution of unicellular K1 & K2							
	•			m, photosynthesis and				
	aerobic m							
				evolutionary time scale;	K2 & K3			
	0		cellular and multi-cell	e				
				enes and proteins; Gene	K2 & K4			
	duplication and divergence.							
5. Appreciate the concepts and rate of change in gene frequency K4 &								
through natural selection, migration and random genetic drift								

K1- Remember; K2- Understand; K3- Apply; K4-Analyze; K5-Evaluate; K6- Create

	Units
	Emergence of evolutionary thoughts: Lamarck and Darwin - concepts of
Unit I	variation, adaptation, struggle, fitness and natural selection - Mendelism -
	Spontaneity of mutations - The evolutionary synthesis
	Origin of cells and unicellular evolution: Origin of basic biological molecules -
	Abiotic synthesis of organic monomers and polymers - Concept of Oparin and
Unit II	Haldane - Experiment of Miller (1953) - The first cell - Evolution of
	prokaryotes - Origin of eukaryotic cells - Evolution of unicellular eukaryotes -
	Anaerobic metabolism, photosynthesis and aerobic metabolism
	Paleontology and evolutionary history: The evolutionary time scale - Eras,
Unit III	periods and epoch - Major events in the evolutionary time scale - Origins of
Unit m	unicellular and multi cellular organisms - Stages in primitive evolution
	including Homo sapiens
	Molecular evolution: Molecular divergence - Molecular tools in phylogeny,
Unit IV	classification and identification - Protein and nucleotide sequence analysis -
	Origin of new genes and proteins - Gene duplication and divergence
Ilmit V	The mechanisms: Population genetics - Populations, Gene pool, Gene
Unit V	frequency - Hardy-Weinberg Law - concepts and rate of change in gene

	frequency through natural selection, migration and random genetic driftb- Adaptive radiation - Isolating mechanisms – Speciation - Allopatricity and Sympatricity - Convergent evolution - Sexual selection - Co-evolution - Altruism and evolution

	Animal Physiology							
Cours	e Objective	es:						
The main obj	ectives of th	is cours	e are:					
1.				dge on physiology of diff	erent organs in			
	animals							
2.				ent systems such as diges				
				on and nervous system of	animal relating			
	them to	1	e and functions of v	arious organs.				
Course I	:	Core						
Course title	:	Anima	al Physiology					
Credits	:	4	Hours:5	COURSE CODE:23MZO3C3				
Pre-requisite	Pre-requisite:							
Students show	Students should know the fundamentals of structure and functions of organs and organ							
systems of an	systems of animals.							
Expected Course Outcome:								
On the successful completion of the course, student will be able to								
1.	Understand	the fur	nctions of different s	ystems of animals	K1			
2.		comp	arative anatomy o	f heart structure and	K2			
	functions							
3.								
	chemical regulation of respiration							
4.	Acquire knowledge on the organization and structure of K3 & K5							
	central and	periphe	central and peripheral nervous systems					

**K1** - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** – Create

	TT •/
	Units
Unit I	Blood and circulation: Blood corpuscles, haemopoiesis and formed elements, plasma function, blood volume, blood volume regulation, blood groups, haemoglobin, immunity, haemostasis. Cardiovascular system : Comparative anatomy of heart structure, myogenic heart, specialized tissue, ECG – its principle and significance, cardiac cycle, heart as a pump, blood pressure, neural and chemical regulation of all above
Unit II	Respiratory system: Comparison of respiration in different species, anatomical considerations, transport of gases, exchange of gases, waste elimination, neural and chemical regulation of respiration
Unit III	Nervous system: Neurons, action potential, gross neuro-anatomy of the brain and spinal cord, central and peripheral nervous system, neural control of muscle tone and posture. Sense organs: Vision, hearing and tactile response
Unit IV	Digestive system: Digestion, absorption, energy balance, BMR. Excretory system: Comparative physiology of excretion, kidney, urine formation, urine concentration, waste elimination, micturition, regulation of water balance, blood volume, blood pressure, electrolyte balance, acid-base balance
Unit V	Endocrinology and reproduction: Endocrine glands, basic mechanism of hormone action, hormones and diseases; reproductive processes, gametogenesis, ovulation, neuroendocrine regulation. Thermoregulation: Comfort zone, body temperature- physical, chemical, neural regulation, acclimatization: Stress and adaptation

				Stem cell biolo	gy					
Course	<b>Objectives:</b>									
The ma	in objectives of	f this co	urse are	:						
	1. Students should know understand the basics of stem cells									
Course	Ι	:	Elect	tive V						
Course title : Stem cell biology										
Credits : 4				Hours:5	COURSE CODE:23MZO3E1					
Pre-re	quisite:	I	1							
Studer	nts should unde	rstand t	he basic	s of stem cells	and its applications					
Expect	ed Course Out	tcome:								
On the	successful con	npletior	n of the	course, student	will be able to					
Ι	Understand th	ne basic	knowle	dge of stem cel	ls and their origin	K1 & K2				
II	Differentiatin	g the en	nbryoni	c and adult sten	n cells	K3 & K4				
III	Understand an	nd apply	the cur	rrent stem cell t	herapies for their research	K5				
<b>K1</b> - R	emember K2_	Unders	tand <b>K</b>	3- Apply: K4-A	nalyze: <b>K5-</b> Evaluate: <b>K6-</b> (	reate				

	Units
Unit I	Introduction to stem cell biology: Stem cell definition, origin and hierarchy, stem cell properties, Identification and Characterization, potency and differentiation, niche of stem cell, overview of different stem cell types (embryonic stem cells, adult stem cells and induced pluripotent stem cells).
Unit II	Embryonic stem (ES) cell: Characterization and properties of ES cells , pluripotency and self-renewal of ES cells; molecular mechanisms regulating pluripotency and maintenance of the stem state, progressive differentiation of ES cells into ectoderm lineage organs (skin, brain and nerve), mesoderm lineage organs (heart, kidney, muscle, bone and blood), and endoderm lineage organs (lung, liver, stomach, pancreas and intestine).
Unit III	Adult stem cells: Mesenchymal stem cells (MSCs) - sources, properties (plasticity, homing and engraftment), potency and characterization; Haematopoietic stem cells (HSCs) - sources, properties, potency and characterization; steps involved in production of induced pluripotent stem cells (iPSCs); role of Yamanaka factor in iPSCs.
Unit IV	Stem cell and aging: aging theory; cell cycle; telomere and telomerase; senescence of stem cell; role of stem cell in aging; tissue repair and regeneration of adult stem cell.
Unit V	Current stem cell therapies: Advantages and disadvantages of ES cells and adult stem cells (MSCs and HSCs) therapy; Ethical concern on stem cell therapy; current stem cell therapy for various diseases; clinical outcome of stem cell therapy; state of clinical trials in adult stem cells for various diseases.

	SEC-2									
				Dairy	y Farming					
	rse Object									
The 1	main objec	tives	of this c	ourse are:						
	1. Students should know basic concepts in Vermiculture									
Course I Skill Enhancement Course [SEC] - II										
Cour	ourse title : Dairy Farming									
Cred	Credits:2Hours:3COURSE CODE:23MZO3S									
	Pre-requisite:									
Stud	lents shoul	d be a	ware of	economic and	cultural importance of Dairy farm	ing.				
Expe	ected Cou	rse Oi	utcome							
Upor	n completio	on of t	his cou	rse, Students w	ould have					
Ι				*	in Dairy farming. To know the us of India in global market.	K2 & K3				
II	To be a	ble to	apply 1	the techniques	and practices needed for Dairy	K1, K2 &				
	farming	•				K3				
III	To know plans ag			ties in Dairy fa	arming and be able to propose	K5 & K6				

	Units
Unit I	Introduction to Dairy Farming- Advantages of dairying- Classification of breeds of cattle-Indigenous and exotic breeds- Selection of dairy cattle. Breeding- artificial insemination-Dairy cattle management-General Anatomy.
Unit II	Construction of Model Dairy House - Types of Housing - Different Managemental Parameters - Winter Management - Summer Management
Unit III	Feedstuffs available for livestock- Roughages -Concentrates - Energy rich concentrates - Protein rich concentrates - Mineral Supplements - Vitamin Supplements - Feed additives - Feeding management - Calves Feeding - Feeding of adults - Feeding of pregnant dairy animals - Feeding pregnant heifer.
Unit IV	Milk-Composition of milk-milk spoilage-pasteurization - Role of milk and milk products in human nutrition – Dairying as a source of additional income and employment.
Unit V	Contagious disease - Common Bacterial - Protozoal - Helminth and Viral Diseases - Parasitic Infestation - Vaccination - Biosecurity.

Ability Enhancement Compulsory Course Soft Skill - III								
			Vermicu	llture				
Course Obj								
The main of	jectives of	f this course	are:					
1.	Stude	ents should	know basic conce	pts in Vermiculture.				
Course I	:	Ability E	Enhancement Cor	npulsory Course Soft S	Skill - III			
Course title	:	Vermicu	lture					
Credits	Credits : 2 Hours:3 COURSE CODE:23MZO3A1							
Pre-requisite:								
Students sh	ould be aw	are of econ	omic and cultural	importance of Vermicu	ılture.			
Expected C	ourse Out	tcome:						
Upon comp	etion of th	is course, S	tudents would hav	ve				
I To	understan	d the vario	us practices in ve	rmiculture. To know				
the	needs for	r Vermicult	ure and the statu	is of India in global	K2 & K3			
ma	rket.							
II Ab	le to app	ply the te	chniques and p	ractices needed for	K1, K2 & K4			
ver	miculture.				, •• •• ••			
III To	know the	difficulties	in Vermiculture an	nd be able to propose	K5 & K6			
pla	ns against	it.						
K1- Reme	mber; K2-	Understand	d; K3- Apply; K4-	Analyze; K5-Evaluate;	K6- Create			

	Units
Unit I	Earthworms - Taxonomic position, external features - shape, size, colour, segmentation, setae & clitellum. Body wall, coelom- locomotion,digestive, circulatory, respiratory, excretory & nervous system. Reproductive system-Male & Female, copulation, cocoon formation & fertilization, development of earth worm. Vermitechnology- Definition, history, growth and development in other countries & India, significance.
Unit II	Vermiculture - definition, common species for culture; Environmental parmeters; culture methods – wormery - breeding techniques; indoor and outdoor cultures - monoculture and polyculture - merits and demerits.
Unit III	Vermicomposting of wastes in field pits, ground heaps, tank method, roof shed method, static pile windrows, top fed windrows, wedges & bin method, harvesting the compost, storage.
Unit IV	Applications of vermiculture - Vermiculture Bio-technology, vermicomposting, use of vermicastings in organic farming/horticulture, earthworms for management of municipal/selected biomedical solid wastes; as feed/bait for capture/culture fisheries; forest regeneration.
Unit V	Potentials and constraints for vermiculture in India. Marketing the products of vermiculture - quality control, market research, marketing techniques – creating the demand by awareness and demonstration, advertisements, packaging and transport, direct marketing. Economic importance of Earthworms: In sustainable agriculture, organic farming, earthworm activities, soil fertility & texture, soil aeration, water impercolation, decomposition & moisture, bait & food.

# SEMESTER-IV

Core X							
	Immunology						
<b>Course Obje</b>							
The main obje	ectives of th	is course	e are:				
1.	To impa	To impart conceptual understanding of functional organization of immune					
	system	and its re	esponsiveness in he	alth and disease.			
2.	To enab	ole a succ	cessful performance	in Immunology componer	nt of CSIR-		
	UGC N	ET.					
Course I	:	Core X					
Course title	:	Immunology					
Credits	:	4	Hours:4	COURSE CODE:23MZO4C1			
Pre-requisite	2:						
Students wou	ld have basi	c knowle	edge in animal scier	nce, particularly functional	anatomy, cell		
biology and d	evelopment	al biolog	y.				
<b>Expected</b> Co	urse Outco	me:					
Students wou	ld have acqu	uired clea	ar knowledge on				
1.	Various b	pasic cor	ncepts in immunolo	ogy and organization of	K2		
	immune s				K2		
2.				health and their defects	K2 & K4		
	in various				N2 & N4		
3.	<b>* *</b>		<b>e</b> 1	principles in biomedical	K3 & K5		
	sciences	sciences including blood transfusion, tissue grafting and					
	organ trai						
4.	Vaccinol	ogy and i	ts importance in dis	sease management	K3		

	Units
Unit I	Introduction to Immunology: An overview; Scope of immunology, recognition of self and non-self as a basic functional feature of immune system; Concepts of external and internal defense systems; External (first line / innate) defense system: components, distribution, salient functions; Internal (second line / acquired) immune system: cellular and humoral immune components- distribution, salient functions-primary and secondary immune responses; Immune tissues / organs: types, anatomical location, structure and development; lymphocyte traffic during development; Types of immunity: innate and acquired - types, functional features; concept of adaptive immunity
Unit II	Antigens: Definition, characteristic features and classification; Antigenicity versus immunogenicity; Adjuvants: definition, types and applications
Unit III	Major effector components of cellular immune system: Lymphocytes - types, morphology, clones; sub-populations, distribution, B and T cell receptors, B and T cell epitopes, Toll-like receptors; Antigen presenting cells: antigen processing and presentation, MHC molecules and their immunologic significance
Unit IV	Major effector components of humoral immune system: Antibodies - Primary structure, classification, variants and antigen-antibody interactions; Structural and functional characteristics of various antibody classes; Generation of diversity; Monoclonal antibodies: definition, production and applications; Antibody engineering and its applications. Complement system - Components, three major activation pathways, and immune functions including anaphylaxis and inflammation. Cytokines - Definition and salient functional features; Interleukins: definition, types (lymphokines and monokines), and functions.

		Interferons - Origin, types and functions
		Diseases and immune responses: Hypersensitivity: definition, Types I to IV
Unit V		and immune manifestations; Auto-immune diseases: onset, spectrum of
		diseases, and major immune responses; Immunodeficiency diseases: types
		including SCID and consequences; Viral (HIV), bacterial (tuberculosis) and
		parasitic (malaria) diseases: etiology, host immune responses and evasion by
		pathogens; Vaccines: types, preparations, efficacies and recent developments

	Core XI						
Ecology							
<b>Course Obje</b>							
The main obje	ectives of th	is course a	are:				
1.		Knowing the ecology and climatic changes at world level and its impact or					
		resources.					
2.				actors for pollution in the en	nvironment and		
	the way		-	ing to natural conditions			
Course I	:	Core XI					
Course title	:	Ecology	1				
Credits	:	4	Hours:4	COURSE CODE:23MZC	<b>D4C2</b>		
Pre-requisite	:	1					
Students show	ıld know ab	out the fu	ndamentals and	studied the ecology of livin	g organisms.		
<b>Expected Co</b>	urse Outco	me:					
On the succes			course, student				
1.	Learn abo	ut the eco	system, biotic c	ommunities and utilizing	K2		
	the energy	1					
2.	Study the	various co	ommunity and p	opulation and population	K2 & K3		
	control						
3.	Understand	d the fund	lamentals of cli	matic conditions and its	K2 & K6		
	impact on						
4.			e of pollution	and the ways for its	K4 & K5		
		control/reduction					
5.				olid waste management	K2 & K6		
K1 - Remen	nber; <b>K2 -</b> U	Jnderstand	; <b>K3 -</b> Apply; <b>K</b>	4 - Analyze; K5 - Evaluate;	K6 - Create		

	<b>T</b> T •/
	Units
Unit I	The Environment: Physical environment; biotic environment; biotic and abiotic interactions. Habitat and niche: Concept of habitat and niche; niche width and overlap; fundamental and realized niche; resource partitioning; character displacement.
Unit II	Population ecology: Characteristics of a population; population growth curves; population regulation; life history strategies ( $r$ and $K$ selection); concept of metapopulation-demes and dispersal, interdemic extinctions, age structured populations -action taken to control population explosion.
Unit III	Species interactions: Types of interactions, interspecific competition, herbivory, carnivory, pollination, symbiosis. Community ecology: Nature of communities; community structure and attributes; levels of species diversity and its measurement; edges and ecotones. Ecological succession: Types; mechanisms; changes involved in succession; concept of climax
Unit IV	Ecosystem: Structure and function; energy flow and mineral cycling (CNP); primary production and decomposition; structure and function of some Indian ecosystems: terrestrial (forest, grassland) and aquatic (fresh water, marine, eustarine). Biogeography: Major terrestrial biomes; theory of island biogeography; biogeographical zones of India.
Unit V	Applied ecology: Environmental pollution; global environmental change; biodiversity-status, monitoring and documentation; major drivers of biodiversity change; biodiversity management approaches - Waste management. Conservation biology: Principles of conservation, major approaches to management, Indian case studies on conservation/management strategy (Project Tiger, Biosphere reserves).

Core XII							
Lab Course	Lab Course in Genetics, Evolution, Animal Physiology, Immunology and Ecology						
<b>Course Objectiv</b>	ves:						
The main object	ves of this	s cours	se are:				
1.	To pro	vide h	ands-on training	to perform specific lab courses	in		
	immu	nology	and research me	thodology.			
2.	To ena	able cl	ear understanding	g of the methodology through we	et – lab		
	course	s.					
Course I	:	Core	Core XII				
<b>Course title</b>	:	Lab	Lab Course in Genetics, Evolution, Animal Physiology,				
		Imm	unology and Ec	ology			
Credits	:	4	Hours:6	COURSE CODE:23MZO4	P1		
Pre-requisite:	•						
Students should	l acquire tl	ne bas	ic knowledge rele	evant to a particular lab course.			
<b>Expected Cours</b>	e Outcom	ne:					
Upon completion	on of this l	ab cou	rse, the students				
1. Acquire	ability to	o perf	orm/ demonstrate	e various basic concepts in			
immuno	immunology as well as applications of research methods for K3 & K4						
quantita	quantitative/ qualitative analysis of biochemical components.						
IZ1 D 1	IZA II	1 /	1 172 A 1 172	A Analyza US Evaluate UC C			

Genetics
1. Experiments to prove the Mendelian laws;
a) Monohybrid Cross using two coin tossing.
b) Dihybrid Cross using four coin tossing
2. Observation in Mendelian traits in man.
Evoution
1. Demonstration of genetic drift using colour beads.
2. Study of variation of finger prints of II M.Sc., Zoology students.
Animal Physiology
1. Estimation of Oxygen consumption in fish.
2. Osmoregulation in fish;
a) Salt loss in fish
b) Salt gain in fish
Ecology
1. Estimation of $O_2$ in different water samples.
2. Estimation of $Co_2$ in different water samples.
3. Estimation of Salinity in different water samples.
Immunology
1. Identification of various immune tissues and organs in chick
2. Identification of various types of immune cells in peripheral blood
smear
3. Methods of blood sampling
4. Agglutination reaction: Qualitative analysis of antigen-
antibody reaction using human blood group system

	DSE-VI						
	Aquaculture						
Cou	rse Objectives:						
The	main objectives						
	1.	Studen	its sho	ould know basi	c concepts in Aquaculture.		
Cou	rse I	••	Ele	ective VI			
Cou	rse title	:	Aq	uaculture			
Crea	lits	:	3	Hours:4	COURSE CODE:23MZO4E	1	
Pre-	Pre-requisite:						
Stuc	lents should know	w the fin	fishes	s and shell fish	es of commercially important ca	indidate species.	
Exp	ected Course O	utcome:					
Upor	n completion of t	this cours	e, Sti	idents would h	ave		
Ι	To develop knowledge on the fish farm and their maintenance. Understand the methods of fish seed and feed production and develops knowledge on hatchery techniquesK1 & K2						
II	To apply the knowledge about different culture methods in aquaculture and gain knowledge on fish and shrimp breeding techniques and larval culture <b>K3 &amp; K4</b>						
III	Identifies the different fishes diseases, diagnosis and their management strategies. Understands Ornamental fishes and central aquaculture organizations       K5 & K6						

	Units
Unit I	Importance of aquaculture- Present status, prospects and scope in India. Freshwater aquaculture- Brackishwater aquaculture- Mariculture - Metahaline culture in India. Types of fish culture -Types of fish ponds for culture practice. Topography, site selection - water quality - soil condition and quality – structure and construction design and layout - inlet and outlet. Water quality management for aquaculture. Control of parasites, predators and weeds in culture ponds. Fish farm implements - Secchi disc - aerator - pH meter - tools for hypophysation - feeding trays – Fishing gears used in aqua farming.
Unit II	Procurement of seed from natural resources- collection methods and segregation. Hatchery technology for major carps and freshwater prawn. Artificial seed production –Breeding under control conditions, induced breeding technique, larval rearing, packing and transportationCommercial substitute for pituitary extracts. Classification of fish feed- Artificial feedsTypes, Feed - formulation - feeding methods. Live feed- Microalgae, Rotifer, Artemia and their culture.
Unit III	Shrimp hatchery technology - Hatchery design, brood stock management, spawning, larval rearing, Shrimp developmental stages, algal culture, packing and transportation. Shrimp culture technology - extensive culture methods semi- intensive - intensive culture methods - Biofloc technology - Culture operations (water quality, feed and health management) - harvesting, preservation and marketing. Brackish water fish culture. Edible and Pearl oyster culture - pearl production. Crab culture. Economic importance of Lobster, Sea urchin and Sea

	cucumber - their by-products. Types of Seaweeds - species and methods of culture – by-products						
Unit IV	Fish and Shrimp diseases and health management – infectious diseases - Bacterial, Fungal, Viral, Protozoan; Non-infectious - environmental and nutritional diseases. Diseases diagnosis, prevention and control measures.						
Unit V	Types of ornamental fishes (freshwater and marine), their breeding behavior and biology. Oviparous, Ovo-viviparous and Viviparous fishes. Setting and maintenance of freshwater Aquarium tanks. Central aquaculture research organizations- CMFRI, CIBA, CIFT, CIFA, CIFE, MPEDA and its activities.

	SEC-III									
	Animal behaviour									
	Course Objectives:									
The r	The main objectives of this course are:									
	1. Students should understand basic concepts in Animal behaviour.									
Cour	Course I Skill Enhancement Course [SEC] - III									
	:									
Cour	Course title : Animal behaviour									
Cred	its	:	2	Hours:3	COURSE CODE:23MZO4S1					
	Pre-requisite:									
Stud	ents should b	e awa	re of ecolog	gy and the anim	nals in their respective environ	ments.				
	cted Course									
Upon	completion	of this	course, Stu	idents would h	nave					
Ι	Recall and	record	d genetic ba	sis and evolut	ionary history of behaviour.	K1 & K2				
II	Analyse and identify innate, learned and cognitive behaviour and K3 & K4									
	differentiat	e betv	veen variou	s mating syste	ems.					
III	IIClassify movement and migration behaviours and explain environmental influence upon behaviour.K1, K4 & K5									
1/1			-			Curata				
KI	- Kemember;	KZ-	Understand	; <b>KJ-</b> Apply; I	K4-Analyze; K5-Evaluate; K6-	Create				

	Units
Unit I	Genetic material, Genes and chromosomes, Genetic variation, Single and Polygenic inheritance of behaviour, Heritability of behaviour, Natural selection and behaviour, Frequency distribution of phenotypes, Darwinian fitness, Evolution of adaptive strategies.
Unit II	Sexual selection, Altruism, Sexual strategy and social organisation, Animal perception, Neural control of behaviour, Sensory processes and perception, Visual adaptations to unfavourable environments.
Unit III	Coordination and Orientation, Homeostasis and Behaviour, Physiology and Behaviour in changing environments, Animal Learning, Conditioning and Learning, Biological aspects of learning, Cognitive aspects of learning.
Unit IV	Instinct and learning, Displacement activities, Ritualization and Communication, Decision making behaviour in Animals, Complex behaviour of hobey bees, Evolutionary optimality, Mechanism of Decision making. The mentality of Animals: Languages and mental representation, non-verbal communication in human, mental images,Intelligence, tool use and culture, Animal awareness and Emotion.
Unit V	Organization of circadian system in multicellularanimals; Concept of central and peripheral clock system; Circadian pacemaker system in invertebrates with particular reference to Drosophila; Photoreception and photo- transduction; Molecular bases of seasonality; The relevance of biological clocks for human welfare - Clock function (dysfunction); Human health and diseases - Chronopharmacology, chronomedicine, chronotherapy.
